

MUHAMMAD IRSYAD IFFWAT AZHAR

Computer Science Graduate | Full-Stack Developer (Laravel • PHP • JavaScript)

Seremban, Negeri Sembilan | irsyad.iffwat@gmail.com | (+60) 18-3523158 | [linkedin.com/in/irsyad-iffwat](https://www.linkedin.com/in/irsyad-iffwat) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science graduate and Full-Stack Developer at Elvira Systems Sdn Bhd, with hands-on experience across the full Software Development Life Cycle, from requirements analysis and system design through development, testing, deployment, and support. Experienced with Laravel, PHP, JavaScript, MySQL, and REST APIs, and comfortable working with data through dashboards, automation scripts, and analysis. Also worked on IoT prototyping and hardware integration, and brings Google Cloud training in infrastructure and AI alongside developing AWS and Linux fundamentals. Detail-oriented, adaptable, and comfortable collaborating with cross-functional teams to deliver reliable software solutions.

TECHNICAL SKILLS

Full-Stack Development: Laravel, PHP, JavaScript, MySQL, REST APIs, HTML, CSS, Bootstrap

Programming & Data: Python, SQL, Pandas, NumPy, Flask, PyTorch

Software Engineering Practices: SDLC, System Design, API Integration, Automation, Git, GitHub

Cloud & Cybersecurity: Google Cloud Architecture (training), Cyber Threat Intelligence (CTI), Virtual Private Network (VPN), Cybersecurity Fundamentals

Currently Learning: AWS (hands-on EC2 instance, pursuing AWS Certified Cloud Practitioner – CLF-C02), Linux fundamentals (file permissions)

Hardware & IoT: BBC micro:bit, Motion:bit, Ultrasonic Sensors, L298N Motor Drivers, Robotics Prototyping

Data & Reporting Tools: Google Looker Studio, Microsoft Excel, Google Sheets, Google Apps Script

Professional Skills: Problem Solving, Communication, Teamwork, Time Management, Leadership, Fast Learner

Languages: Bahasa Melayu (Native), English (Professional Working Proficiency)

GOOGLE CLOUD TRAINING

- Google Cloud Digital Leader Training
- Modernize Infrastructure and Applications with Google Cloud
- Digital Transformation with Google Cloud
- Innovating with Google Cloud: Artificial Intelligence
- Exploring Data Transformation with Google Cloud

WORK EXPERIENCE

Full Stack Developer | Elvira Systems Sdn Bhd — Cyberjaya

Jul 2026 – Present

- Participate in the full Software Development Life Cycle, including requirement analysis, development, testing, debugging, documentation, deployment, and user support.
- Develop and maintain enterprise web applications using Laravel, MySQL, JavaScript, and REST APIs.
- Collaborate with designers and stakeholders to translate business requirements into development tasks, providing regular progress updates to keep the team aligned.
- Prepare technical documentation, user guides, and system reports.
- Research and troubleshoot software issues methodically, debugging and resolving them while implementing enhancements based on user feedback.

Software Engineer Intern | Elvira Systems Sdn Bhd — Cyberjaya

Apr 2026 – Jul 2026

- Developed an internal Web App Link Center using Google Apps Script to centralize and streamline access to company project repositories and resources.
- Built and deployed a web-based Smart Inventory Dashboard to improve the tracking, accuracy, and transparency of corporate hardware assets.
- Designed a training room booking system to automate internal administrative workflows and maximize resource scheduling.
- Engineered the "Blind Path-Finder" prototype, an assistive haptic navigation device for the visually impaired, integrating BBC micro:bit, Motion:bit, and ultrasonic sensors.
- Programmed custom motor control logic using L298N drivers to optimize hardware-software interaction for robotics applications.

- Managed the digital setup and official website for the national-level micro:bit Innovation and Robotic Competition (mIRC) 2026.
- Collaborated on corporate web enhancements to improve the UI/UX and professional layout of the company's main digital presence.

Data Analyst | Jabatan Pendidikan Negeri Sembilan — Seremban

Oct 2023 – Feb 2024

- Developed the "War Room SPM 2023" Dashboard using Google Looker Studio to analyze state-wide exam results (SPM, Trial Exams, and Mid-terms).
- Managed and integrated data sources using Microsoft Excel and Google Sheets to feed real-time data into interactive visualizations.
- Implemented advanced dashboard features including Pivot Heat Tables and Slider Filters to allow officers to filter data by district, school, and subject.

EDUCATION

Bachelor of Computer Science (Hons.) | Universiti Teknologi MARA, Jasin, Melaka

Mar 2024 – Aug 2026

CGPA: 3.20 | Relevant Coursework: Database Engineering, Artificial Intelligence Algorithms, Game Design & Development

Diploma in Computer Science | Universiti Teknologi MARA, Jasin, Melaka

Aug 2021 – Mar 2024

CGPA: 3.39 | Relevant Coursework: Data Structures, Computer Organization, Digital Electronics, Information Systems Development

PROJECTS

Personalized Investment Platform – BERT + ABSA Recommendation System | Final Year Project

- Built a Flask-based recommendation system applying BERT and aspect-based sentiment analysis (ABSA) to process and interpret app review data, using PyTorch, Pandas, and NumPy for the underlying pipeline.

Competition Registration System | Google Apps Script

- Built a web application that synchronized registration data from Google Forms and Google Sheets, automating participant management and improving data accuracy for administrative reporting.

ADDITIONAL INFORMATION

- Malaysian Citizen
- Fluent in English and Bahasa Malaysia
